

## ALGEMA FIT-ZEL Vehicles and trailers for car transport

Outstanding. Premium. Appealing.

ALGEMA FIT-ZEL's efficient vehicles and trailers provide the right solution for every situation.

# ALGEMA BLITZLADER 2

ALGEMA presents the next logical step in the evolution of the Blitzlader, the Blitzlader 2. The totally redesigned hydroBalance running gear makes the Blitzlader 2 even safer and more comfortable. Experience a professional standard of vehicle transport with the robust tilting mechanism which makes loading and unloading as quick as possible.

## Benefits of the Blitzlader 2

- Payload of up to 3.1 t
- Tilting-chassis fully hydraulic
- Traction assistance for moving off when roads are slippery
- Low drive-up angle of approx. 9° (3.5° option available)
- Loading gauge: 5,500 x 2,100 mm
- CAN bus electrical system with touchpad in driver's cab

## Benefits of the hydroBalance

- Hydropneumatic running gear with body roll compensation
- Automatic, load-dependent lift axle
- Automatic leveling after loading
- Progressive rate suspension for maximum comfort

**ALGEMA FIT-ZEL**  
EDER GmbH brands

### Can be used for a wide range of purposes

- Trips to distributors in dealership groups
- Breakdown and recovery services
- Transporting cars that have been involved in accidents
- After-sales service trips (pick-up and delivery)
- Delivering vehicles to customers
- Logistics for old and young timers
- Processing used cars
- Logistical support for car sharing

# FIT-ZEL SPEEDER 2

With an extremely low unladen weight, starting at 2.1 t, the Speeder 2 is one of the lightest car transporters in its class. The automatic air suspension and disc brakes, which come as standard, ensure a high level of safety and driving pleasure.

## Benefits of the Speeder 2

- Heavy-duty, low-built running gear with aluminium/steel compound design
- A loading bed that can be electro-mechanically tilted
- Compressor controlled leveled air suspension
- 2 x 1.6 t axles with disc brakes (3 t pair of axles)
- Is driven similarly to a car
- A low centre of gravity ensures optimum handling when cornering
- Loading height of only 630 mm
- Low drive-up angle of only 7.5° (3.5° option available)
- Reduced vehicle and fuel costs

**ALGEMA FIT-ZEL**  
EDER GmbH brands

### Advantages when restricted to 3.5 t permissible total weight *(option)*

- Category B driving licence (car licence)
- Subject to the same speed limits as cars
- Not subject to HGV toll (in Germany)
- Not subject to obligation to have a tachograph (without using a trailer)
- Not subject to Sunday driving bans
- Not subject to HGV overtaking bans

# ALGEMA BLITZLADER R

The Blitzlader R is the stand-out vehicle for professional car transport. A payload of up to 3.1 t makes the Blitzlader R a one-of-a-kind vehicle in this class! Innovative technology ensures an ideal level of economic productivity, and exceptional driving comfort and a high level of safety.

## Benefits of the Blitzlader R

- Payload of up to 3.1 t
- Running gear with air suspension
- Tilting-chassis, fully hydraulic
- Optional mechanical lift axle
- Low drive-up angle of approx. 9° (3.5° option available)
- Ready to load in 8 seconds

**ALGEMA FIT-ZEL**  
EDER GmbH brands

### A wide range of accessories

- Radio remote control
- Loading accessories, e.g. electrical winches
- Protective equipment for breakdown services
- Load-securing devices
- Lockable storage compartments
- Spare wheel
- Tow hitch

# FIT-ZEL BEAVER TAIL

The Beaver Tail is extremely well-suited to hauliers looking to reduce purchasing costs. It is suitable for transporting payloads of 1.2 t to 4 t, depending on the running gear used. The robust design of all the components means it can be used over a long period of time without any issues.

## Advantages of the Beaver Tail

- Low purchase price
- Solid aluminium design
- High quality craftsmanship
- Simple and effective technology
- All components have a robust design
- Ideal for use as a "road train" with a cross-over trailer

**ALGEMA FIT-ZEL**  
EDER GmbH brands

## ORIGINAL SPARE PARTS AND ACCESSORIES

### The service we offer you

- After-sales care
- Retrofitting for special purposes
- Maintenance using approved spare parts
- Quick delivery with right to withdraw from contract within 14 days
- Secure and convenient payment methods

# FIT-ZEL BE-TRANS DUO

The BE-Trans DUO is a trailer concept for efficiently transporting more than one vehicle. The state-of-the-art components make a payload of up to 3.8 t possible

## Benefits of BE-Trans Duo

- Carrying two cars increases efficiency of transport
- Payload of up to 3.8 t with a category BE driving licence
- Can be used 24/7 without being subject to HGV tolls
- Logistical concept for dealership groups or hauliers

**ALGEMA FIT-ZEL**  
EDER GmbH brands

### **Gross train weight of 7.0 t with a category BE driving licence**

The perfect towing combination for drivers with a category BE licence. Added value thanks to low driving licence costs, the ability to be flexible in assigning staff and maximum transport capacity.

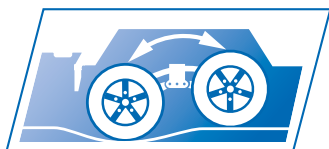

# FIT-ZEL EURO-TRANS

The EURO-TRANS is a versatile trailer for professional vehicle transport. The extremely lightweight solid aluminium design ensures a very high payload of up to 2,900 kg. The self-tilting mechanism, in addition to the high quality technology and aesthetics make EURO-TRANS one of a kind in its class.

## Benefits of the Euro-Trans

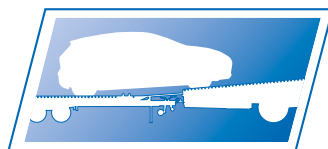

- Payload of up to 2,900 kg
- High payload ratio thanks to a light, fully welded, solid aluminium design
- Self-tilting mechanism allows easy loading in the shortest time possible
- Automatic locking mechanism
- Low drive-up angle of only 7.5° (3.5° option available)

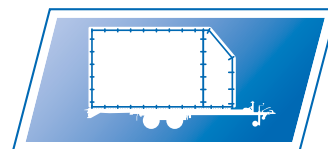

Swinging axle

Lift axle

Cross-over trailer

Tarpaulin cover structures

**ALGEMA FIT-ZEL**  
EDER GmbH brands

### Comfortable luxury running gear with swinging axle

- 100 % load distribution provides the highest degree of active driving safety
- Extremely safe handling
- Comfortable driving on uneven roads
- Compensation for different coupling heights
- Equal braking action on all wheels

### Tarpaulin cover structures

Roll-down tarpaulin cover structures to protect valuable goods from prying eyes and dirt.

#### Extras for tarpaulin cover structures

- Sliding curtains
- Side flaps and flaps at the rear
- Zip fastener, allowing side-access
- Additional mirror to assist with loading
- Aluminium cross-profile with two runners for unrolling
- Automatic tarpaulin rollers

# RANGE OF TRAILERS FROM ALGEMA FIT-ZEL

## ALGEMA AT

- Payload of up to 2,800 kg
- Tilting design without ramps
- Swinging axles with 100% load compensation
- Automatically swivelling taillights
- Infinitely adjustable wheel stop frames

## ALGEMA MULTITRANS

- Payload of up to 2,600 kg
- Tilting design
- Swinging axles with 100 % load compensation
- Tailgate as a drive-up ramp, with a height of up to 800 mm
- 350mm-high aluminium side plates

**ALGEMA**

An EDER GmbH brand

### FIT-ZEL DUO

- Payload of up to 4,200 kg (Duo compressed air)
- Solid aluminium design
- Three-axle tridem and two-axle tandem versions
- Loading length of 8.3m with a total length of only 9.71 m
- Transport capacity for two vehicles or long materials

### FIT-ZEL UNI-TRANS

- Payload of up to 2,600kg
- Solid aluminium design
- Permissible total weight 3.5 t (technical total weight of axle assembly  $3 \times 1.5 \text{ t} = 4.5 \text{ t}$ )
- Perfect for transporting large vehicles and all kinds of transport tasks

For over 30 years, the EDER name has been a guarantee of high quality, technologically innovative and practical solutions for trailers and vehicles for car transport. These are known and used throughout all of Europe, under the Brands ALGEMA and FIT-ZEL names. Again and again it has formed the basis for creating solutions that shape technical development in this market sector. The development of a lift axle for trailers and, in the field of transport vehicles, the tilting Blitzlader are two examples of this.

Today ALGEMA and FIT-ZEL branded vehicles and trailers continue to set standards when it comes to payload, ease of use, handling, functionality and design. In the interests of the customer, it places importance on added value, such as availability while at the same time keeping operating costs low.

That's not the only reason why so many vehicle manufacturers rely on close cooperation with EDER GmbH when it comes to car transporters. The automotive industry and its sales organisations, car dealerships, garages, companies specialising in bodywork and paint, those specialising in the transport of sports vehicles and vintage cars, as well as international breakdown services all put their trust in the quality that comes with the words "made by EDER".
